Thanks Frank.

I spoke with Marty today as well and as far as he is concerned everyone who needs access to the data has it already.

If we get future data requests even from within the respective region they need to be directed to the regional POC with a cc to Janine.

We spoke to Janine today who requested a combo subscription for the Six Gold King Mine projects. There are two Gold King mine projects each for Region 6, Region 8 and Region 9. Each region has an Operations and an Analytical Scribe Project. Weston would like there to be a Combo project for all six projects that will then be published back to [Scribe.NET](#). Weston will then use this [Scribe.NET](#) Project ID as the data source for reporting, etc..

Later today, we will create and test the Gold King Mine Combo Subscription and Publish to Scribe.NET. I asked Janine about who (with START :), would be responsible for doing the daily subscribe and publish process. Janine was not sure. Until that gets worked out, we can get the Combo subscribe/publish process started here in Edison.

Thanks,

Frank
